

Fonderia F.LLI GIOVANNINI S.P.A.

production of grey and spheroidal graphite cast iron

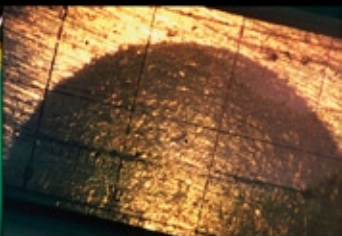

Company

The company was formed in Fano in 1946. Today it occupies an area of approximately 10,000 square metres and produces grey and spheroidal graphite cast iron mainly for the hydraulic, motor and mechanical components sectors.

Through a team of trainers and valid assistants who care for the efficient and planned use of human resources and maintenance of the available plants and equipment in a state of full efficiency. It has the aim of giving full satisfaction to the over 200 existing customers with over 3000 articles, and to any others who may join them, providing a dynamic and reactive response to their needs.

The company also uses a consolidated working network with long-term suppliers/partners

- to construct CASTING EQUIPMENT,
- to supply CORES and casting components in general,
- to carry out FINISHING and SURFACE TREATMENT of the castings.

Plant

CUPOLA FURNACES cold air, diameter 800 mm, with a manufacturing capacity of approx. 4 ton/hour.

Electric HOLDING FURNACE induction, 26 tons

Electric FURNACE FOR AUTOMATIC CASTING induction, 4 tons

STATION for spheroidisation TREATMENT with flux cored wire

AUTOMATIC GREEN FORMING PLANT with an hourly forming capacity of 100 bars size 600 x 740 h. 250 + 250 mm; equipped with automatic plate change, also suitable for production of medium and small production batches of cast elements weighing from 1 to 70 kg

DESANDING PLANTS belt, loading frame and spray gun.

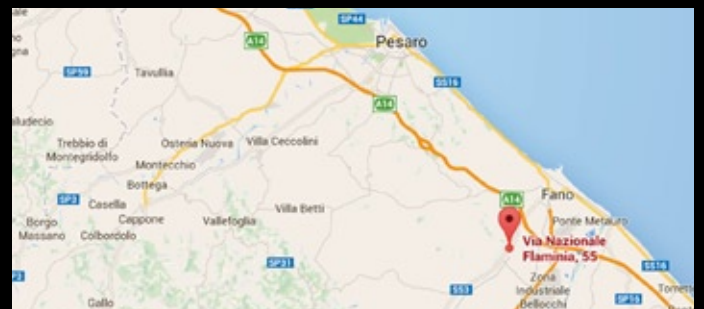

Quality

CERTIFICATES
